

# COMPRESSOR HIRE

## COMPAIR REAVELL 5437

### Electric high pressure compressor

These are the workhorses of our high-pressure compressor rental fleet, with a water-cooled, cast-iron construction they are capable of truly continuous running.

Commonly used for breathing air, when coupled to a dryer, and in naval dock yards for warship and submarine support. These high-pressure compressors are also active around the world – from the tropics to the poles – on seismic surveys. In fact, they are useful anywhere rugged reliability and high-pressure air is required.

## COMPAIR REAVELL 5437

Electric high pressure compressor

### KEY DATA

Make	Compair Reavell
Model	5437
Duty	130m <sup>3</sup> /hr 50Hz, 156m <sup>3</sup> /hr 60Hz
Max pressure	350bar
Prime mover	55kW electric motor with a 380/415V 50Hz or 440V 60Hz supply
Noise level	95dBA at 1m
Transmission	Direct drive
Cooling	Water cooled by integral radiator
Control	Fully automatic by pressure switch
Condensate	Timed drainage to a condensate tank
Air quality	ISO 8573-1 2010 class 5
Enclosure	Steel crash frame
Dimensions	276 x 185 x 185cm
Weight	2,734kg
