

EEL

Piston Corer

Description

The EEL Piston Corer is capable of recovering 96mm diameter samples up to 6m in length, in up to 4,000m of water. The corer is easily deployed via a crane or A-frame. For deep water applications, it may be necessary to deploy the corer with our deep-water winch and neutrally buoyant synthetic rope.

EEL

Piston Corer

Key data

Depth rating	4000m
Sample length	3m or 6m
Core barrels	Steel construction
Sample diameter	96mm
Core liners	Clear plastic 100mm O.D. & 96mm I.D.; 2mm wall thickness
Piston Core weight	500kg
Dimensions	See image on cover
Additional equipment supplied	Mini HPU and Kullenberg Trigger
